

The cyclodextrins of **CYCLOFRESH®/ CYCLOFRESH® PLUS** can be compared to buckets. In the beginning, these buckets are empty.

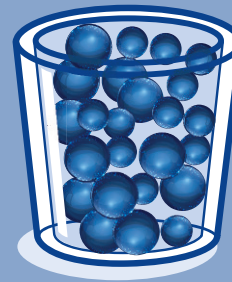

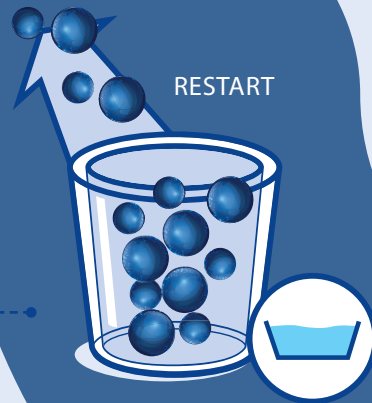

**READY  
FOR ACTION  
AFTER EVERY  
WASH.**

The organic molecules are "stored" in these buckets.

In the machine wash the malodor causing particles are washed out. The bucket is ready for action again.

The bucket is filled with organic molecules which can no longer be degraded into unpleasant smell.
